

VOR: IFRS 9 Waterway

We at FRG know that IFRS 9 adoption is a challenge when it comes to data volume and quality, model management, resource availability, and maintenance costs. Our decades of experience tells us this challenge is best met with a risk intelligence platform that is vast, fast, and nimble.

That is why we created the IFRS 9 waterway for VOR.

The IFRS 9 Waterway seamlessly brings all your disparate data and models together in its cloud-native architecture. It employs best practices for the most accurate results. Because of its ability to stream the processing, IFRS 9 Waterway runs smarter and faster. Every ounce of processing power earns its keep.

The granularity of IFRS 9 Waterway ensures complete transparency of input, models, transformations, and results. With its inherent audit and compliance features, IFRS 9 Waterway automatically self-documents. Gone are the days where the process had to be described, detailed, and constantly updated in a separate location.

IFRS 9 Waterway is an open-source platform that eliminates the need to lock yourself into specific methodologies or models. Designed for model management, IFRS 9 Waterway lets these coexist, be calibrated, and switched at will, and evolve with your business.

More than that, IFRS 9 Waterway connects to your methodologies and models in whatever technology and language they use. That makes the IFRS 9 process adapt to your resources, not the other way around.

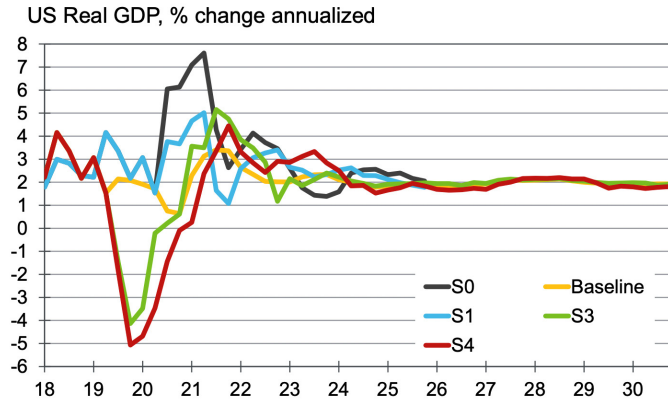

IFRS 9 Waterway is part of the **VOR Risk Intelligence Suite**. Other **VOR** modules are:

- **Stream**—Smarter, faster processing *
- **Performance**—Investment return and attribution
- **Private Capital**—Cashflow forecasting
- **Risk Premia**—Systematic portfolio management
- **Reporting**—Built for portfolio managers
- **CECL**—Jump start your CECL implementation

** Patent pending*

To charge up your implementation, IFRS 9 Waterway comes with the Weighted-Average Remaining Maturity (WARM) and the Vintage Analysis methodologies built in and raring to go.

IFRS 9 Waterway serves up results that are tailored for reporting and can be consumed anywhere. Real-time updates of management dashboards and user-defined templates are straight out of the box.

Wherever you are in your IFRS 9 adoption, FRG and IFRS 9 Waterway can meet you there. We can help put together a solid and data-driven strategy that will work now and for years to come. And we can take on as much as you need to get it up and running.
